

5 Day Programme for RNs (ABA Category Pending)

14th, 25th October, 11th, 25th November & 9th December (5 Full Days)

This new course offers Registered Nurses (RNs) working in older adult care settings the opportunity to develop and expand their knowledge, skills and attitudes in providing sophisticated dementia care across a range of settings. The course will enable RNs to take a critically self-reflective approach to identify what evidence-based practice achieves. The course is designed to run over 5 full days in a 10-week period and will include both national and international best practice innovations. The aim of this innovative course is to enable RNs to develop cultures of person-centeredness and improve the quality of life and quality of care for people with dementia.

The course is centred around 5 Themes:

- Theme 1** Memory loss and Dementia typology and implications
- Theme 2** Climate for sophisticated dementia care: innovation and action
- Theme 3** Therapeutic interventions: past, present and future directions
- Theme 4** Supporting the person with responsive behaviour
- Theme 5** Confidence & competence for innovative practice

The approach taken on this course will be that of work-based learning where the learner will be required to undertake specific activities between each formal education day in order to demonstrate professional learning and improve reflective skills.

- Week 1-2** Evaluate own work place culture
- Week 2-4** How is person centeredness revealed
- Week 4-6** Leading an innovation (therapeutic intervention)
- Week 6-8** Using an ABC approach recording and resolving
- Week 8-10** Managing change and increasing benefit
